

## Barcode Libraries for HSAJET® Printers

HSAJET® Printers and software are delivered with extensive barcode libraries to match the needs for barcode printing in various industries.

The table below provides an overview of the most common barcodes available and ready to use with each software. As a standard, HSA Systems offers the full list of barcodes as part of our software, as shown below. The list is not exhaustive. Contact us for specific barcodes that are not included in the below table.

In addition to below barcodes, you can easily create print jobs with any barcode with our InkDraw PDF Tool, which is part of the standard InkDraw 3 software package for CB6e Premium and Infinity Printers.

NiceLabel integration is possible with MCI and MCX, which also enables barcode printing and label management.
