

# Security Printing

Inkjet printing with UV invisible ink

## TESTIMONIAL

“ At Vaba Maa we use Collins CM631 UV invisible ink delivered by HSA Systems to print data on high security products for some of our customers.

With CM631 UV invisible ink we can make quality prints that are only visible under UV light.

This means we can easily meet the requirement from our customers for invisible prints on security products.”

Ahto Päril, CEO - Vaba Maa Ltd, Tallinn, Estonia
