

# HSAJET® InkDraw 3.0

## Powerful Software for Design and Print Control

### Perhaps the most Versatile Software Packages on the Market

HSA Systems' in-house developed software, InkDraw 3.0, is a Windows based print job editing tool specially designed for HSAJET® Premium and HSAJET® Infinity printers.

InkDraw 3.0 is well-suited for a wide range of applications and industries and meets the demands within product identification and commercial printing, such as letter shops, labels, etc.

### User-friendly Interface

The software has an intuitive graphical user interface that combines powerful functions with ease-of-use. The user interface is available in multiple languages, such as English, Danish, French, German, Italian, Portuguese and Spanish.

Due to its user-friendly interface, InkDraw 3.0 allows you to define and run jobs within a few minutes. You can assemble images, text and barcodes and quickly arrange them into print messages. Text, date, logos, graphics, numbering, barcodes, and mail objects are easily created and precisely positioned. All objects are managed by drag and drop.

### Print from PDF files

InkDraw 3.0 handles input files such as XLSX, CSV and TXT. With the PDF Tool extension it is also possible to print directly from PDF files.

### Remote Network Control

When used with HSAJET® Premium Printers, InkDraw 3.0 can be operated remotely via Ethernet. Our communication protocol makes it easy to let a production unit take control of the printer and to modify data remotely.

### Important Features

- Fast processing of print data
- Real time design and print
- Advanced text manipulation and filters
- Advanced object link functions
- All objects are freely movable and scalable
- Unlimited number of any object types
- Use of any Windows font
- Large professional barcode library
- Full production screen with a clear production overview
- File manager with search options and adaptive search field

## InkDraw 3.0 Extensions

### Take your Production to the Next Level with Advanced InkDraw Extensions

In addition to the InkDraw standard package, we offer various extensions with features specially developed to meet the demands for different print productions and industries.

#### Mail Tool

Mail Tool is developed specifically to meet the specific requirements for printing applications within the mailing and addressing industries. Mail Tool includes out-signals for connection of e.g., stacker/bundle machine and sorting conveyor.

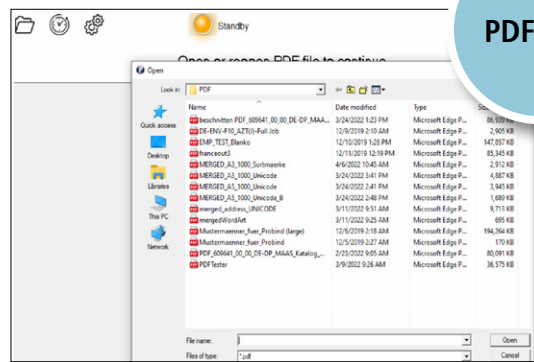

#### Event/Stacker

The Event/Stacker extension allows you to activate a signal further down the line, based on content or change in the database. It can be used to precisely control bundlers, diverters, sorters, cameras etc. Event/Stacker is included in the Mail Tool software, but is also available for purchase separately for CB6e Premium printers. For Infinity Printers, Event/Stacker is included in the standard InkDraw software package.

#### PDF Tool

- Maximising Security. Minimising Risk of Error.

PDF Tool offers an incredibly safe platform to print from and is ideal for print productions with no room for error. PDF Tool processes PDF files with unprecedented speed. Regardless of file size, the platform renders the PDF file with no delay and in 10 seconds or less, you are ready to start printing, ensuring smooth transitions between productions.

#### Integration Tool

The Integration Tool is made for fast and simple integration between third-party software and hardware and the InkDraw software. The Integration Tool enables direct database search and allows data from third-party software to be sent to the HSAJET® printer for printing without the use of any protocol or programming. The InkDraw software interface shows real time database search, print count and print speed.

#### Printer and Software Compatibilities

InkDraw 3.0 is a licensed software from HSA Systems. The software is compatible with Windows 8 to 11 (32 or 64 bit).

InkDraw 3.0 is used with HSAJET® CB6e and HSAJET® TIPC15 Premium printer configurations as well as HSAJET® Infinity Printers.

InkDraw 3.0 for use with HSAJET® Premium and Infinity Printers.
